

Pedro Sacramento

Senior Software Engineer | TypeScript, Node.js, ReactJS

Coimbra, MG, Brazil | pedro.sacramento@gmail.com | linkedin.com/in/pedro-sacramento-1b99b05b

Profile

Senior Software Engineer with 20+ years in web development, focusing on scalable TypeScript and React applications. Passionate about interactivity, performance, and reliable systems. Experience in remote collaboration, mentoring, and research in interactive tactile interfaces using maker technologies.

Core Skills

TypeScript, Node.js, ReactJS, PostgreSQL, Linux, 3D printing.

Experience

Senior Software Engineer — Procore (via FullStack Labs)

2022–Present

- Built and maintained production systems using React, TypeScript, Ruby, Go, and PostgreSQL.
- Authored scalable designs, technical specs, and POCs improving performance and usability.
- Collaborated cross-functionally on data consistency and user experience improvements.
- Delivered end-to-end features for enterprise SaaS clients, ensuring code quality and maintainability.

Fullstack Developer — Universidade Federal de Viçosa (UFV)

2013–2022

- Developed and maintained web applications and e-learning platforms.
- Led small teams and coordinated educational technology initiatives.

Educator — High School & University Level

2005–2022

- Taught programming, web development, and robotics to high school and undergraduate students using maker technologies.

Freelance Web Developer & Internships

2001–2011

- Developed interactive content for the federal government and small businesses using Adobe Flash, PHP and MySQL.

Education

M.Sc. in Computer Science, Universidade Federal de Viçosa

2010–2013

B.Arch., Universidade Federal de Viçosa

2004–2010

Technical Degree in IT, ETEV

2003–2004

Languages

English: Advanced

Brazilian Portuguese: Native

Honors & Highlights

- MVP (Mar 2023, Oct 2023, Oct 2024) — top contributor recognition at Procore.
- Recognized multiple times by students for teaching excellence.
- Published research on shape-changing interfaces at SIGGRAPH Asia 2019 with a patent pending and a Tactile Tic-Tac-Toe simulator to demonstrate the concepts.
